Football Glove Cleaning & Grip Restoration

STANDARD CLEANING

FIG. 1 — SPRAY

Apply 2 light, even sprays of BLU-42 to the grip surface of one glove.

FIG. 2 — WORK IT IN

Rub the gloves together to loosen dirt, grass, dust, and debris while working BLU-42 across the entire grip surface.

Don't forget the thumbs.

FIG. 3 — WIPE CLEAN

Use a clean rag or hand towel to thoroughly wipe away loosened debris and excess product.

PRO LEVEL — GRIP FINISH

Once the gloves are clean, apply 1 additional spray to a single glove.

Rub the gloves together, working the product across the entire grip surface — **including the thumbs** — until the gloves are sufficiently dry and reach the desired tacky feel.

Ready. Set. Get a Grip.

Court Sport Shoe Sole Cleaning & Grip Restoration

STANDARD CLEANING

FIG. 4 — SPRAY

Apply 2 light, even sprays of BLU-42 to the sole of one shoe.

FIG. 5 — WIPE CLEAN

Use a clean rag or hand towel to thoroughly wipe away loosened debris and excess product.

Repeat with other shoe.

QUICK GRIP

Apply 2-3 light, even sprays to each shoe. Let dry for 15-20 seconds, and hit the floor with confidence.

PRO LEVEL — PREP FOR THE NEXT GAME OR PRACTICE

Spray the bottom of the shoe with 3 to 4 sprays. Lightly scrub with a small soft-medium-bristle brush, removing court dust and debris. Rinse with lukewarm water only when needed for this Pro Level deep clean. Allow to air dry.

Repeat with other shoe.

Equipment Condition Note

Replace shoes when the outsole or traction pattern is excessively worn, damaged, or no longer provides adequate traction after cleaning.
